

Vacuum Units VE / VER

Suction rate 69 l/min

Vacuum Units VE / VER

Design

- Brass nozzle system
- Steel housing
- Safety non-return valve
- Manometer
- Type VER 15 with internal regulation with the aid of an adjustable pneumatic vacuum switch
- Coating RAL 7035

Suitability for Industry Specific Applications

Applications

- Vacuum unit for use as pneumatically driven vacuum generator with internal regulation
- Vacuum is generated only when a load is connected
- Suitable for all vacuum clamping and handling tasks

Product highlights

- The "stand-alone solution" with ejector, monitoring and control for all clamping and handling tasks
- Air saving function (optional) ensures economical continuous operation
