

Bellows Suction Cups with Sealing Ring

Bellows Suction Cups with Sealing Ring

Design

- Suction cups from the series FSGA and FSGPL with integrated sealing ring
- Bellows suction cup FSGPL with 1.5 folds with vulcanize-bonded insert
- Suction cup FSGA with 1.5 folds, consists of suction cup FGA and a suction cup connection nipple (connection nipple attached)

Suitability for Industry Specific Applications

Applications

- Handling workpieces with uneven surfaces, such as wooden boards with rough-cut or ribbed surfaces (furniture parts)
- Handling cardboard boxes with uneven surfaces made possible by folds
- Energy-efficient handling of workpieces despite uneven workpiece surfaces

Product highlights

- Standard bellows suction cup with integrated sealing ring for use on uneven surfaces, easy changeover
- Energy-efficient handling despite uneven workpiece surface thanks to optimally sealing of sealing ring and bellows suction cup
- Sealing rings made of adaptable and wear-resistant special material guarantee long service life and flexible use
