

Flat Suction Cups SGN

Flat Suction Cups SGN

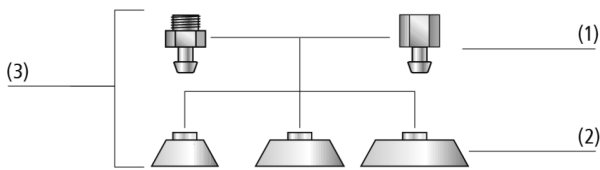

Suitability for Industry Specific Applications

Applications

- Round flat suction cup for the handling of sensitive workpieces
- For use with smooth and uneven surfaces
- Use in rough environments with high chemical resistance

Design

- Robust, wear-resistant suction cup SGN (3) with single sealing lip, consisting of SG suction cup (2) and connection nipple (1)
- Nipple inserted on the suction cup or vulcanized on for maximum load capacity

System Design Flat Suction Cups SGN

Product Highlights

- High suction forces and good static friction with lateral forces due to specially shaped sealing lip
- Design and material optimal for sensitive workpieces and uneven surfaces
- Robust suction cup with high chemical resistance even for the roughest applications
