

## Vacuum Units VE / VER

Suction rate 69 l/min

Vacuum Units VE / VER

### Design

- Nozzle system made of brass
- Steel housing
- Safety non-return valve
- Manometer
- Type VER 15 with internal regulation with the aid of an adjustable pneumatic vacuum switch
- Coating RAL 7035

### Suitability for Industry Specific Applications

#### Applications

- Vacuum unit for use as pneumatically driven vacuum supply with internal regulation
- Vacuum is generated only when a load is connected
- Suitable for all vacuum clamping and handling tasks

#### Product Highlights

- The stand-alone solution with ejector, monitoring and control for all clamping and handling tasks
- Air saving function (optional) ensures economical continuous operation
