

# Rotary Units VEE-RU

## Suitability for industry specific applications

Rotary Units VEE-RU

### Applications

- Rotary connection for use in combination with the vacuum end effector VEE or as an independent component
- Flow rate of 20 m<sup>3</sup>/h or 60 m<sup>3</sup>/h

### Design

- Rotary connection with two standard versions, either with an integrated quick-change module or without the quick-change module for use as a universal rotary connection
- Flow rate of 20 m<sup>3</sup>/h or 60 m<sup>3</sup>/h
- Can be rotated by 360°

### Product highlights

- Rotary unit has same flow as standard VEE flange modules
- Rotatable 360° without winding up the hose
- Hose does not generate tension due to minimized torque
