

Vacuum Modules VEE-QCMV

Suitability for industry specific applications

Applications

- Integrated vacuum generator for gripper VEE
- Eco nozzle technology for high energy efficiency

Vacuum Modules VEE-QCMV

Design

- Quick-change bayonet made of food-grade aluminum
- Connections on sides, for example for a vacuum switch or a solenoid valve for blow-off pulses
- Compact ejector module ecoPump SEP
- Also available with silencer
- Plug-in screw union for compressed air hose with outside diameter of 8 mm

Product highlights

- Pneumatic vacuum generation directly at the gripper requires only small and light compressed air hoses
- High suction capacity with energy efficient vacuum generation
- One-piece nozzle assembly allows quick, easy cleaning
