

## Vacuum Modules VEE-QCMV

Vacuum Modules VEE-QCMV

### Design

- Quick-change bayonet made of food-grade aluminum
- Connections on sides, for example for a vacuum switch or a solenoid valve for blow-off pulses
- Compact ejector module ecoPump SEP
- Also available with silencer
- Plug-in screw union for compressed air hose with outside diameter of 8 mm
- Connecting tubes and plugs for gripper assembly and segmentation into different vacuum zones

### Suitability for Industry Specific Applications

#### Applications

- Integrated vacuum generator for gripper VEE
- Eco nozzle technology for high energy efficiency
- Fully automated filling of cartons in case packers
- Use in primary and secondary packaging processes
- Feeding of products in top-loading machines, carton and tray erectors
- Application in flexible packaging machines with frequent format changes

#### Product Highlights

- Pneumatic vacuum generation directly at the gripper requires only small and light compressed air hoses
- High suction capacity with energy efficient vacuum generation
- One-piece nozzle assembly allows quick, easy cleaning
- FDA- and BfR-compliant high-performance thermoplastic, resistant to alkaline cleaning solutions
- On request, we can supply a completely assembled and ready-to-connect gripper
