

Suction Cup Inserts SPI (for SPB1)

Suction Cup Inserts SPI (for SPB1)

System Design Suction Cup Inserts SPI (for SPB1)

Product Highlights

- Suction cup inserts for bellows suction cups protect sensitive workpieces while at the same time compensating for stroke
- Support structure with flow slots and vacuum channels minimizes surface pressure and prevents suction
- Process reliable sealing even on flexible workpieces
- Can be clipped in without tools for quick and easy installation

Suitability for Industry Specific Applications

Applications

- Suction cup inserts for gentle gripping and depositing of flexible and sensitive workpieces
- Prevents workpiece from being sucked into the suction cup
- Gentle handling of plastic films and paper by means of inner support with simultaneous stroke compensation by the bellows suction cup
- Handling of a wide variety of packaging such as plastic films, paper, blister packaging

Design

- Suction cup inserts (2) are inserted with no tools required into the lower fold of bellows suction cup SPB1 ED-65 (1)
- Suction cup inserts are made of PA with support structure and vacuum channels
