Vacuum Generators ECBPMi

System Design Vacuum Generators ECBPMi

Electric vacuum generator ECBPMi for handling cans

Suitability for Industry Specific Applications

Applications

- Electric vacuum generator for handling suction-tight workpieces
- Flexible application in lightweight robotics, human-robot collaboration (MRK environment) as well as in mobile robotics
- Simple and fast commissioning on lightweight robots thanks to intelligent software support
- Small dimensions and low weight for robots with payloads < 3 kg
- Ideal for automated handling of small parts, e.g. bin-picking with a single suction gripper
- One bellows suction cup inclusive for a complete vacuum gripping system

Design

- Modular adapter flange (1) including cable strain relief
- Disruption-free design adapted to the size of the robot flange
- Available robot integration sets (incl. all necessary parts) for plug & work integration with common lightweight robot types
- Intuitive operation via user interface with capacitive keys (2) and rotating status display
- Integrated NFC interface for commissioning and parameterization via smartphone, integrated IO-Link and RS485 interface for direct robot communication
- Electrical connection cable (3)

Product Highlights

- Extremely compact electric vacuum generator for handling workpieces with a single suction cup
- Universal adaptation to lightweight robots or cobots using a flange adapter plate
- Simple and fast commissioning thanks to central electrical interface (Plug & Work)
- Electrical connection through external cabling or internal pins saves tubing on the robot
