

Liquid Separators NLS

Separation capacity: 60 l/h

Liquid Separators NLS

System design Liquid Separators NLS

Liquid separator NLS in use on a CNC machining center

Suitability for industry specific applications

Application

- Use in CNC machining centers with vacuum system for metal cutting with cooling lubricant
- High separation performance protects even powerful vacuum generators from liquid ingress
- Control and monitoring via the control of the CNC machining center by means of industrial ethernet connection
- Automatic separation and recirculation of the liquid during operation of the machine
- Suitable for continuous use in three shift operation

Design

- Liquid separator in two-chamber design; upper chamber (1) with permanent vacuum for separation during operation
- Lower chamber (2) with separated liquid and hose connection (3) for returning the liquid
- Switchable vacuum supply to the clamping system (4) incl. ventilation with robust pinch valves
- Digital vacuum switch with IO-Link function (5) for monitoring the vacuum level
- Hose connection (6) for connecting any vacuum generator
- Valve unit (7) and bus module (8) for control and integration into the bus system of the CNC machine

Product highlights

- Automatic separation and long life ensure uninterrupted machining and maximize overall equipment efficiency (OEE)
- Vacuum and level monitoring ensure high process control and transparency
- Convenient operation via the machine's HMI thanks to simple integration into the bus system
- Compact design with separate pump saves installation space when integrating into the overall machine
- Sucked in coolant is recycled into the machine and can be reused

Liquid Separators NLS

Separation capacity: 60 l/h

Designation code Liquid Separators NLS

NLS	-	431x276x615	-	AD	-	F	-	EIP
1		2		3		4		5

1 – Abbreviated designation

Code	Version
NLS	NLS

2 – Dimensions

Code	Dimensions: in mm
431x276x615	431x276x615

3 – Additional function

Code	Type
AD	Automatic emptying

4 – Control

Code	Control
F	External controlled

5 – Communication

Code	Type
EIP	EtherNet/IP
PNT	Profinet
-	Without network module

The separator NLS is supplied ready for connection. The electronic integration into the bus system must be carried out by the customer. A function module can be provided on request.
